Mike,

Once you have the spreadsheet, I can add this. However, I am providing an email as a reminder.....

Cecilia,

I am not sure I captured all the right details. Could you edit/correct as needed?

Below is an entry for the Region 7 Weekly Activity Report. It has been formatted according to the provided template (attached). According to the provided template, entries like this may be submitted up to 4-weeks ahead.

- Category: Not sure of the category
- Title: Pesticide analysis for ethanol plants
- Applicable State: Nebraska
- OK to share outside management chain (within EPA): Yes
- Timing: in progress
- Summary: In response to an NDEE request to the Acting Regional Administrator , Barry Evans is collecting information about contractual analysis for pesticides in water, soil, and corn mash from external analytical laboratories. The focus is on pesticide list of about 20 analytes from about three different methods with a short turn-around time (less than 10 days) to provide support to Nebraska and ECAD. This is in support of the spill from the AltEn facility, and can be used for other ethanol facilities who accept off-spec corn (high in pesticides).
